

## **Purchasing Technician- industrial machinery**

### **(Quality assurance for specific projects)**

#### **Based in China (DONGGUAN)**

Our client, is a leading company in industrial machinery for the pharmaceutical sector, headquartered in Spain. In line with its consolidated leadership in innovation and international development, it needs to recruit a **Purchasing Technician (Quality Assurance), Procurement, based in DONGGUAN**, China, for its subsidiary. GENUINE Executive search&Talent solutions, is collaborating exclusively with the company in the search for a professional who can contribute experience as a Purchasing Technician in the **industrial machinery**. **We are looking for Purchasing Technician based in China (Dongguan), with command of English, Chinese and Spanish as an asset.** It is essential that the professional resides in Dongguan or in the surrounding area. The professional must guarantee the quality and suitability of each part for turnkey projects, so he/she must have proven training and experience in machining. This is not a mass purchase.

### **Might you be interested?**

### **Do you have the experience and training described?**

#### **PROFESSIONAL EXPERIENCE REQUIRED**

- Track data, identify improvement projects, and manage cross-functional implementation to improve performance of suppliers and key components by implementing process controls and quality assurance plans.
- **Experience on tooling and industrial sector (machinery, mechanical industrial engineering)** Previous experience and past performance with the product/service to be purchased.
- **Experience interpreting industrial equipment drawings.**
- Liaising with delivery and warehouse teams to ensure goods are received on time.
- Monitoring inventory and writing orders to refill stock.
- Inspecting purchased products upon delivery and reporting any issues timely.
- Updating all records of purchased products.
- Writing reports on purchases made and performing cost analyses.
- Attending and contributing to meetings with staff and other stakeholders.
- Supplier's track record for business-performance improvement.

- Meeting with vendors and clients to negotiate the best contracts.

## **REQUIRED SKILLS**

- Strong technical knowledge and experience to assess and validate parts manufactured by machine shops.
- Orientation to results.
- Strong analytical skills.
- Sound research and networking skills.
- Customer orientation and continuous improvement.
- Good level in English and Chinese, valuable good level in Spanish.

## **Labor conditions**

- Fixed-term contract, subject to city regulations and specific terms and conditions to be negotiated directly with the company.
- Contract formalized by the company's subsidiary in China, although functional reporting will be done with the Spanish headquarters working remotely.
- Competitive labor conditions.
